**DESCRIPTION OF DAMAGE**

Estimated large-scale mosquito control requirements beyond what is normal or customary for this region of San Joaquin County, based on previous experience with flooding.

Applications may include aero-spray, hand-pump in vehicle restrictive areas, and vehicle-mounted application units, mosquito fish.

Additional public and equine threat prevention measures materials and staff outreach will be considered for this site. Cost estimate not included in this initial PDA below.

<b>IMPACT:</b>	<b>%COMPLETE:</b>	<b>COST EST:</b>
		\$29,500.00

Mosquito-transmitted disease that can affect humans, domestic animals and wildlife, including the impending arrival of West Nile Virus (WNV). California State Department of Health, San Joaquin County Health Officer, Environmental Health Department, has stated their concern of the increased WNV breeding grounds for birds to transfer WNV to other parts of this County, including Stanislaus, Contra Costa, Alameda Counties, and beyond. Though mosquitos have 1-2 mile flight limit, birds do not.
