

# SITUATION REPORT NO. 006

Spring Storms 2006 (Order # 02-947)

San Joaquin Operational Area

Date: - April 11, 2006 - Published at: 0900 Hours

Emergency Operations Center – Staffing Level: 1

Operational Period: April 11, 2006 – 0600 Hrs. — April 12, 2006 – 0600 Hrs.

## CURRENT SITUATION:

### Roads:

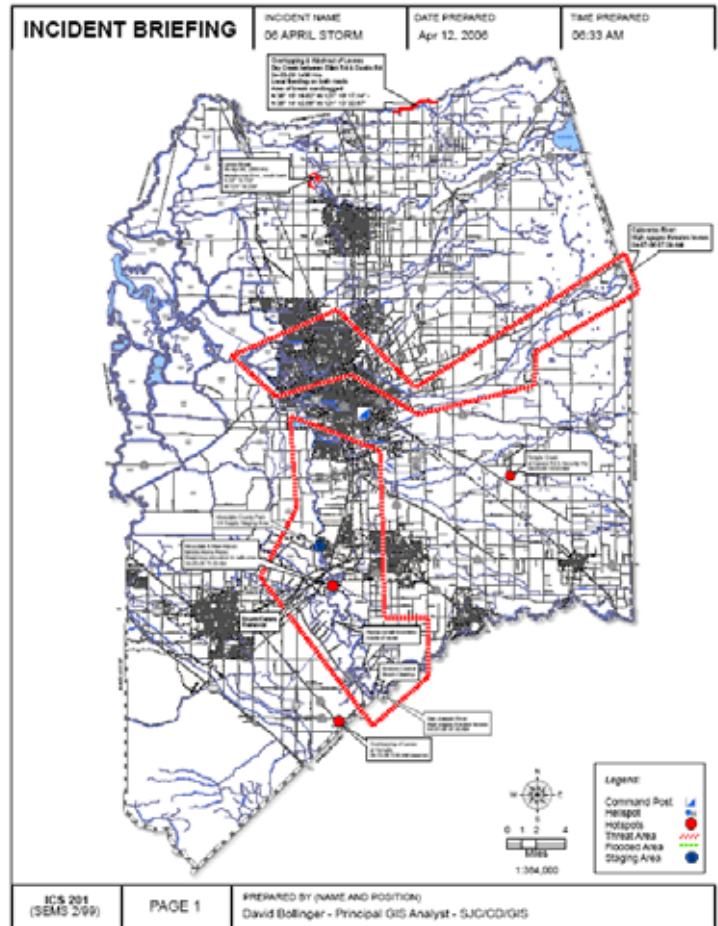

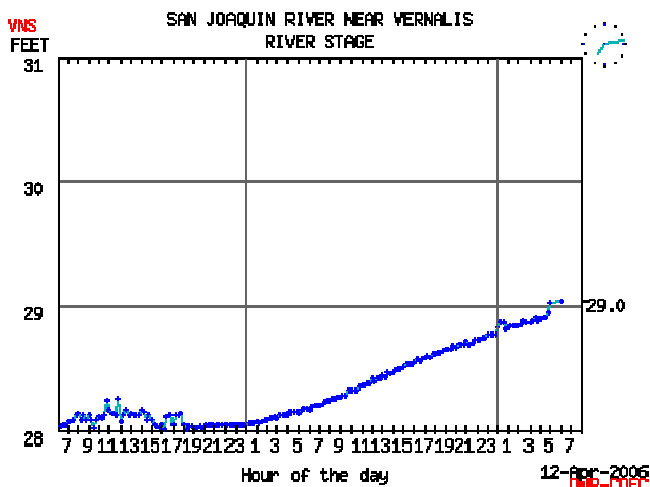

- Woodward Ave closed between McKinley and Airport Way as part of evacuation route.
- Perrin Road west of Airport Way, except local traffic.
- Hays Road open to local traffic only.

### Relocations:

- Residents at Mossdale Trailer Park and Two Rivers RV Park have relocated RVs from low-lying areas. Some residents from other RV parks have also relocated.
- No relocations have been reported from other locations of the county.

### River Status:

- San Joaquin River water levels continue to be monitored at Vernalis Station. As of 06:00 a.m., water level was at 29.4 feet (see graph). Flood stage is 29 feet. As of 07:00 a.m. the level receded some to 29.1 feet.

### **Flooding (Residential):**

- None. No threat to residences. People living near San Joaquin river system levees are encouraged to pay attention to NOAA weather radio or your local media for the latest updates on this situation. Be prepared to take action if an evacuation is ordered in your area.
- County Public Works engaged in pumping storm water runoff from low lying areas of Boggs Tract.

### **CONSEQUENCES:**

- 1. Relocations** – Mossdale Trailer Park; Two Rivers RV Park. None due to Mokelumne River levee break
- 2. Sheltering** – American Red Cross is planning shelter areas in the county.
- 3. School Closings** – None at this time
- 4. Power Outages and Utilities** – No reports.
- 5. Government Closings** - None at this time.
- 6. Fatalities and Injuries** – No reports
- 7. Boil Water Notices** – No reports

### **Flooding (Rivers):**

All major rivers in San Joaquin County are being monitored. Only the San Joaquin River at Vernalis is at flood stage as of 05:00 a.m. this morning. The San Joaquin river and its tributaries will remain at elevated water levels for an extended period. Flood warnings from the National Weather Service have been issued for Vernalis. An additional concern is that warming temperatures will cause increased water runoff, potentially impacting the already high water levels in San Joaquin County reservoirs, rivers and streams.

### **WEATHER:**

- **Today:** Mostly cloudy with a 50 percent chance of rain showers. Temperature will be between 65 to 75 degrees with light winds. Tonight will be mostly cloudy with a 20 percent chance of rain showers. Temperature lows predicted to be between 46 to 54 degrees with light winds.
- **Thursday:** Improved conditions with partly cloudy skies and a 20 percent chance of rain showers. Highs will range between 70 to 80 degrees with southeast winds up to 10 mph. Thursday night will be mostly cloudy with a 40 percent chance of rain. Overnight lows will range between 49 to 55 degrees with southeast winds around 10 mph.
- **Friday:** rain is likely in the morning, tapering off to rain showers in the afternoon. Afternoon temperatures will range from 65 to 73. Light northwest winds predicted between 10 to 15 mph with higher gusts in the late afternoon. There is a 60% chance of showers Friday night.
- **Weekend:** Weather conditions for the weekend and into Monday will be similar to Friday's conditions with intermittent showers and a possibility of rain. A break is predicted for Tuesday.

**OPERATIONAL AREA ACTIONS: (New information in red)**

Planning Area	EOC Level	Local Emergency	Protective Actions	Government Closing	Shelter Status	School Closing
<b>NORTH ZONE</b>						
<b>THORNTON AREA</b>						
NONE						
<b>LODI AREA</b>						
4/9/06	I		Mokelumne River Levee break. No impact on houses or persons.			
<b>LOCKEFORD AREA</b>						
NONE
